Thus the Apollo programme was established by a nation, says DeGroot, that was panicked first by von Braun and then by the 'manipulative, mendacious, scheming and untrustworthy' John F Kennedy. Soviet rocket technology threatened the West and its exploits were damaging America's scientific reputation, von Braun would recite again and again:

Landing on the moon, it was argued, would be good for the economy, for politics. Along the way, he tells the story of the 's space race, something that has been told many times before, but usually shown through heavily rose-tinted glasses. Want to Read saving...

I'm really struggling with giving this a rating. He finds a gang of cynics, den the truth behind one of the most revered fictions of American history, Dark Side of the Moon explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon.
