Construction of this display involved scientists, artists, filmmakers, educators. If, as Smutny suggests, these tapestry patterns and temple layouts are representations of fragmentary remnants from long lost science, what could have been the original source, other than a previously existing technologically advanced civilization? The origin and meaning of these mysterious symbols may have, in fact, remained unknown even to the ancient cultures that utilized them, the ancients knowing only that The Unseen Side of the Spectrum signs and symbols were important clues to even more ancient lost knowledge and powers.

In Albert Michelson and Edward Morley performed a crucial experiment in an attempt to detect the existence of the ether. To support his theory, Smutny points to the massive blocks used for construction of the complexes, noting they are a very good resonant material.

In the great majority of towers the circumference at the base lies between 14m and 16m. Advantages of so produced circuits are very good functions and low losses on high frequencies. The program creates a model showing how a location will perform using different antenna, elevation, azimuths and power settings.
